Short Description

Seymour Duncan SH55N Seth Lover Humbucker Pickup for NECK position.

Description

Seymour Duncan SH55N Seth Lover Humbucker Pickup for NECK position.. Hand built exactly the way Seth Lover designed, these faithful PAFs deliver an open airy humbucker tone for your bridge position

The Seth Lover neck model gives you that warm airy, open tone by striking just the right balance of low end warmth with a smooth but articulate top end. The alnico 2 bar magnet helps to sweeten the high end response, while the vintage output coils bring out this pickups rich harmonic content. Chords will have a full, open sound, and single notes will have a soft, yet articulate feel. The un-potted nickel silver cover gives the tone an almost piano like percussive quality. Pair with the Seth lover neck model for the perfect PAF setup. Each Seth Lover Model humbucker is hand built in Santa Barbara the way Seth Lover designed them. The mold we use for our butyrate bobbins was created by the same factory that built the original PAF mold for Gibson. Other key features include our specially manufactured 42AWG plain enamel mag wire, nickel silver cover, 2.5-inch alnico 2 bar magnet, custom machined metal and maple spacers, single conductor push-back braided lead wire, and nickel silver bottom plate. We wind every Seth Lover humbucker on Seymour's original Leeson winding machine from the early Gibson

factory in Kalamazoo, MI., for that unmistakable vintage tone and feel.
